

NovaTech Cloud Solutions - Enterprise SLA & Refund Policy

Document ID: NTC-POL-2024-V3 | Classification: Public Corporate | Effective: Oct 2024

1. SERVICE LEVEL AGREEMENT (SLA) GUARANTEE

NovaTech commits to a monthly uptime percentage of 99.95% across all Tier-1 and Tier-2 compute clusters. Downtime is measured from verified monitoring heartbeats across multiple availability zones.

Scheduled maintenance notified at least 72 hours in advance is excluded from downtime calculations.

2. REFUND & CREDIT CALCULATION SCHEDULE

For monthly uptime between 99.0% and 99.94%, customers are eligible for a 10% service credit against the following month's invoice.

For monthly uptime between 95.0% and 98.99%, customers are eligible for a 25% credit.

For monthly uptime below 95.0%, customers are eligible for a 50% credit.

Service credits must be formally claimed within fourteen (14) business days of the incident by submitting an authorized ticket to billing@novatech-cloud.internal.

3. EXCLUSIONS & LIMITATIONS

Credits do not apply to account suspensions arising from acceptable use policy violations, distributed denial-of-service (DDoS) attacks exceeding standard volumetric protection thresholds, or customer software configuration errors.

Software add-on licenses, third-party marketplace modules, and reserved GPU hours are non-refundable under all circumstances once provisioned.

4. TERMINATION FOR CHRONIC BREACH

If NovaTech breaches the 95.0% uptime threshold for three (3) consecutive billing cycles, enterprise customers may terminate the subscription agreement with thirty (30) days written notice without early termination penalties.
